### Notes:

1 Permanent Resident and Citizenship processing time should read as 80% of cases finalized in the last 12 months were completed within X months or less.

2 Family Class processing times and age of inventory based on applications lock-in date. Due to data constraint, FCH applications are excluded from the processing time calculation of the Family Class category.

3 The Processing Time for the Live-in Caregivers (End to End processing time) is calculated from the application received from the principal applicant to the latest finalized date from all related applications (i.e. including overseas dependent)

<sup>4</sup> PR Card output for Phase 1 only includes PRC Issued.

\*although IRCC was using GCMS prior to October 05, 2015, the reporting functionality was not available. Manual count of the numbers was still used. As such, inventory does not reflect the true nature of the numbers
